About the Seminar

ISCA was started in the year 1914 in Kolkata. The first meeting of the ISCA was held in January, 1914 at the premises of the Asiatic Society, Kolkata. There have become 26 ISCA Chapters located in all over India. Patna Chapter is one of them. ISCA Patna Chapter is organizing two days Seminar on the **Focal Theme –“ Future India: Science & Technology”**.

Science, which was the offspring of mankind's relentless and dispassionate quest for truth and knowledge, is the basis of the evolution of human beings at such a rapid pace. Without the scientific discoveries and technological innovations it would be unthinkable to imagine a life as we know it today, having its fundamental as well as translational impact in the spheres of agriculture, health care, industries, transportation, communication, and so on. As we approach a world of digital manufacturing, where traditional way of life is paving way for a more efficient and technology-dominated one, the emphasis on science and technology is becoming more and more evident. Realizing the effect of science in the making of modern India, the Indian government has been reiterating on making people science-centric so as to position India as one of the top countries in the field of scientific research. The proposed seminar purports to unite students, researchers, and academicians all over the country for stimulating discussions and deliberations on issues related to the development of science and technology in India.
